

FLIXPICKS

Team Orange

Cody, James, Maulahna, Roxy, Logan, Zachary,
Chance, & Nicholas
Mentor: Laura Sakos

Problem: Finding entertaining and engaging media is becoming increasingly tedious for people due to the rise of numerous streaming platforms and their vast libraries

Problem Characteristics

- Overwhelming number of streaming app choices
- Each streaming service unlocks thousands of different choices
- Time is wasted exploring media on separate apps
- Decision fatigue: Phenomenon in which a large number of decisions or choices hinders the ability to make further choices .

Innovative Features vs. Competition

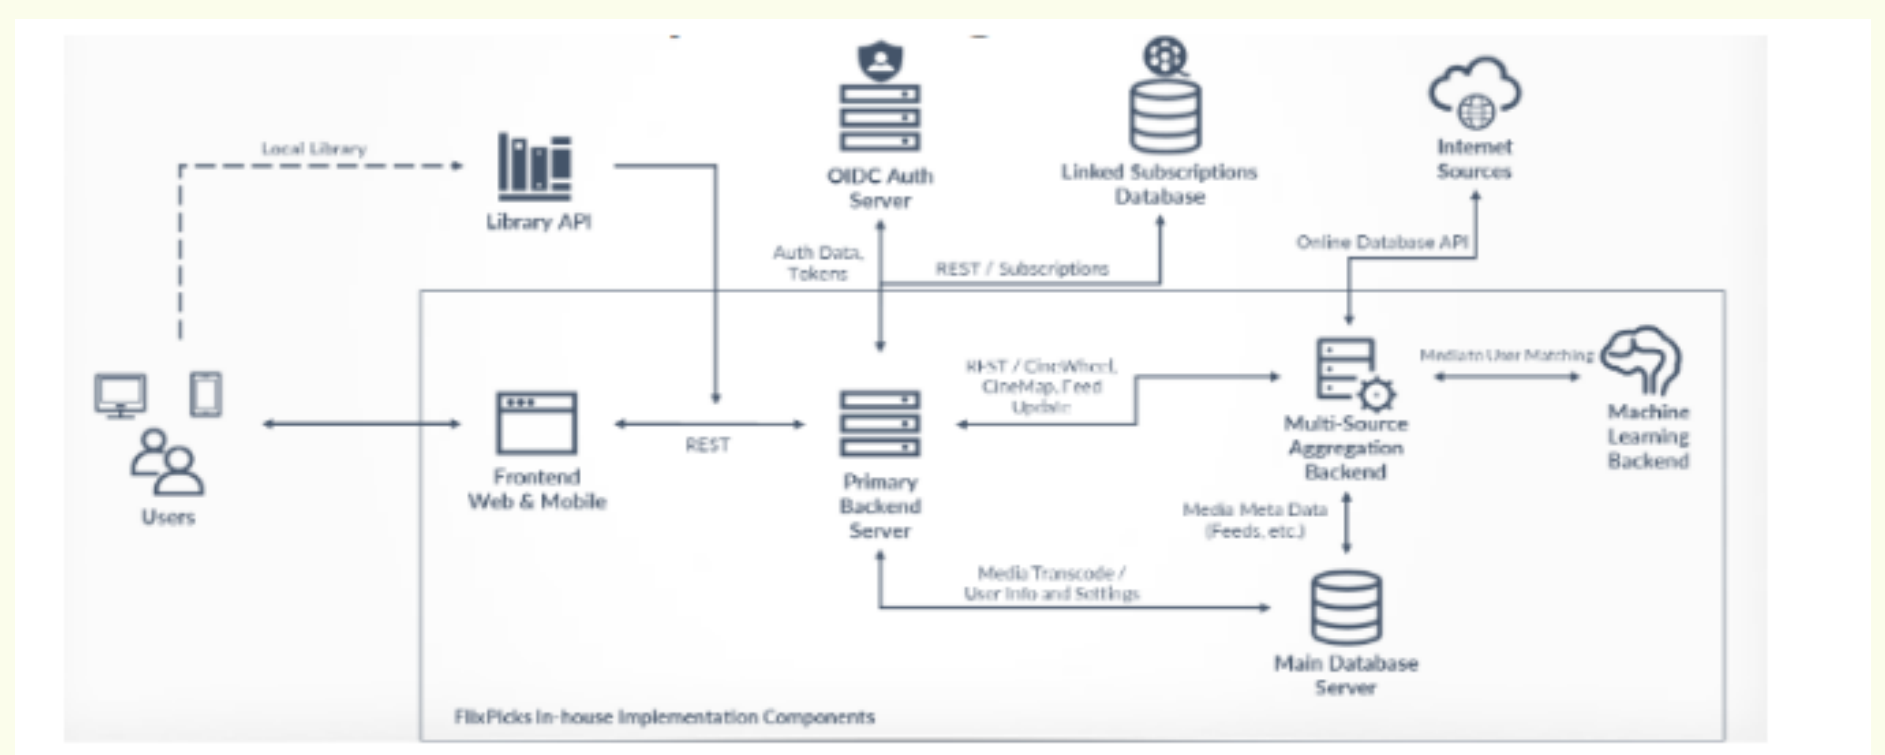

- CineRoll: Randomly selects from recommended media
- CineWheel: Randomly selects from user inputted options for media choices

Solution: FlixPicks is the solution!

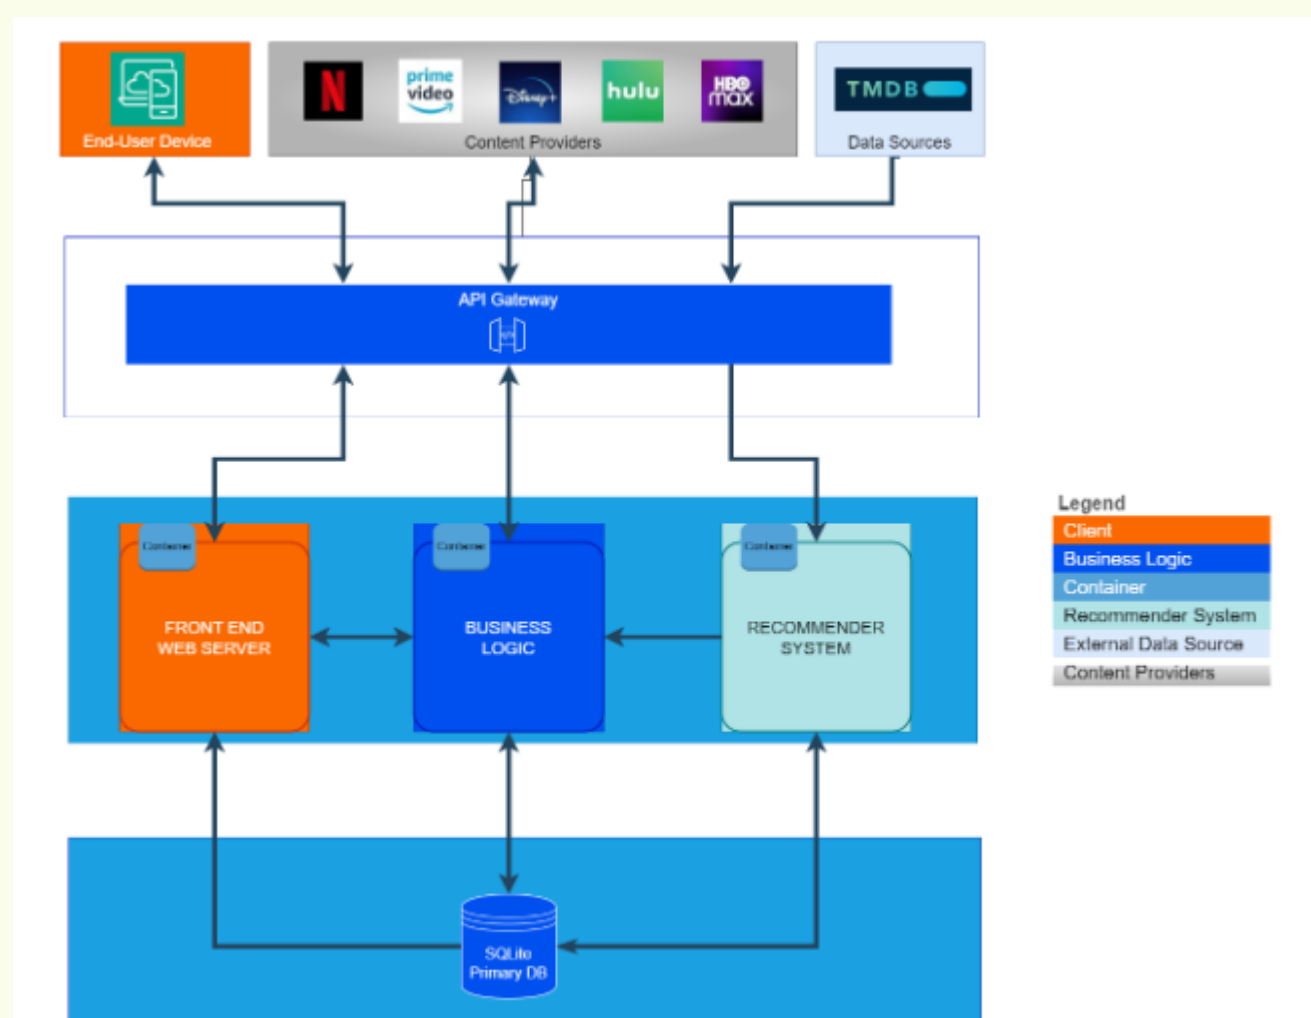

Solution Characteristics

- All of your subscriptions in one place
- Recommendations based on your interests across all streaming platforms.
- Randomized choices, and randomized choices based on your interests.

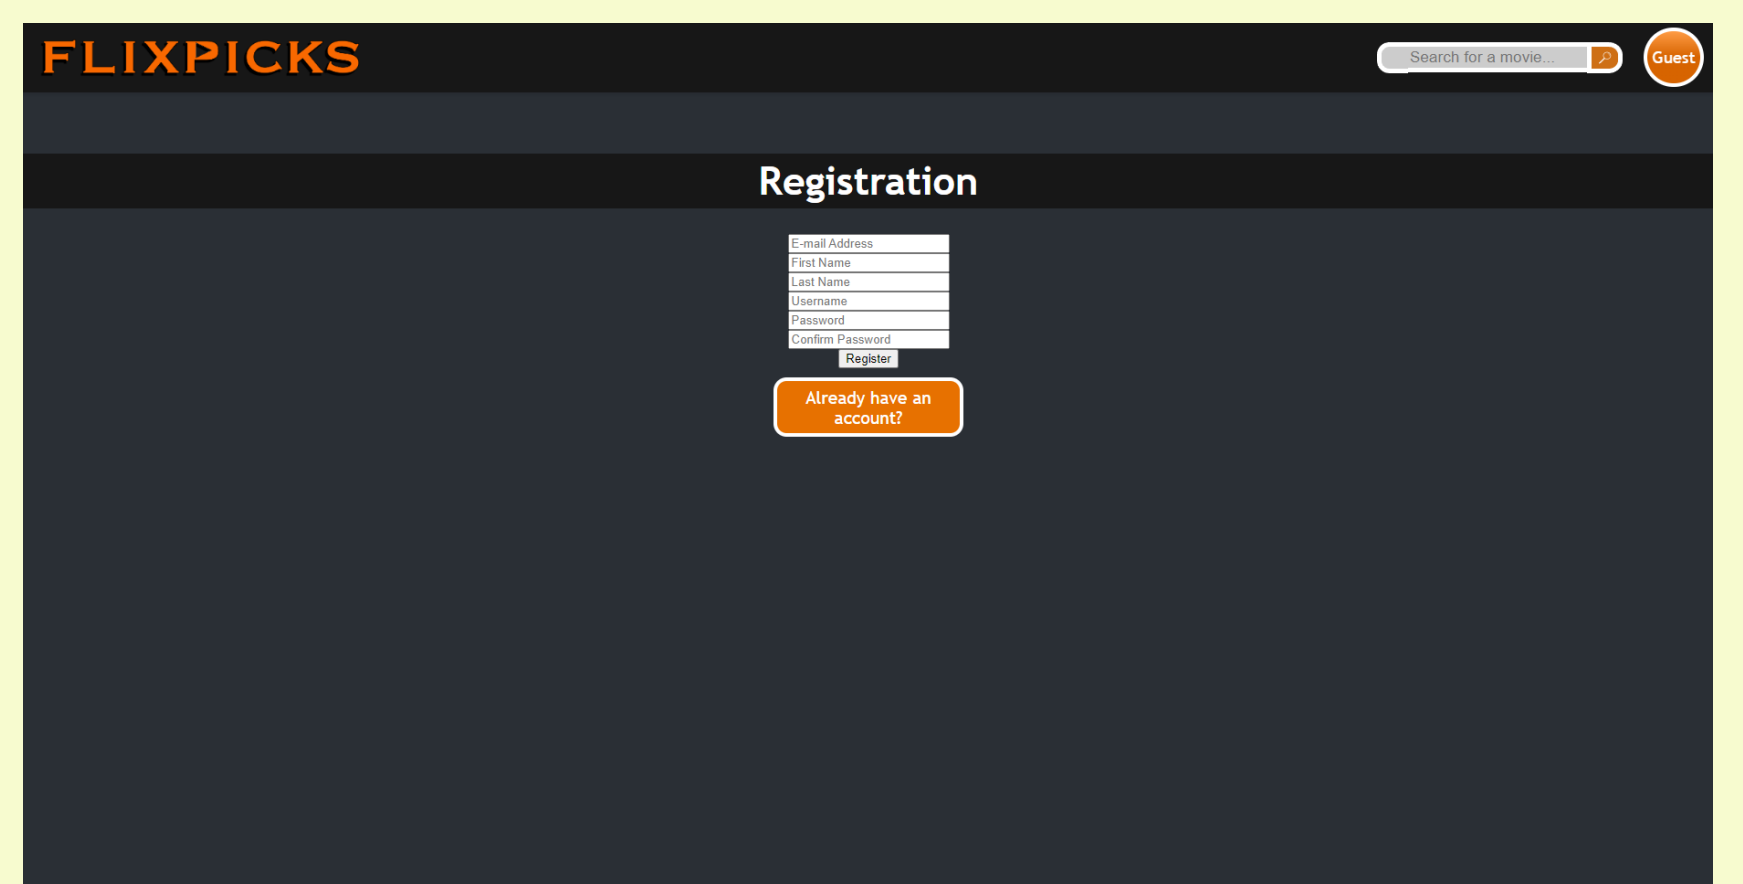

MFCD for RWP

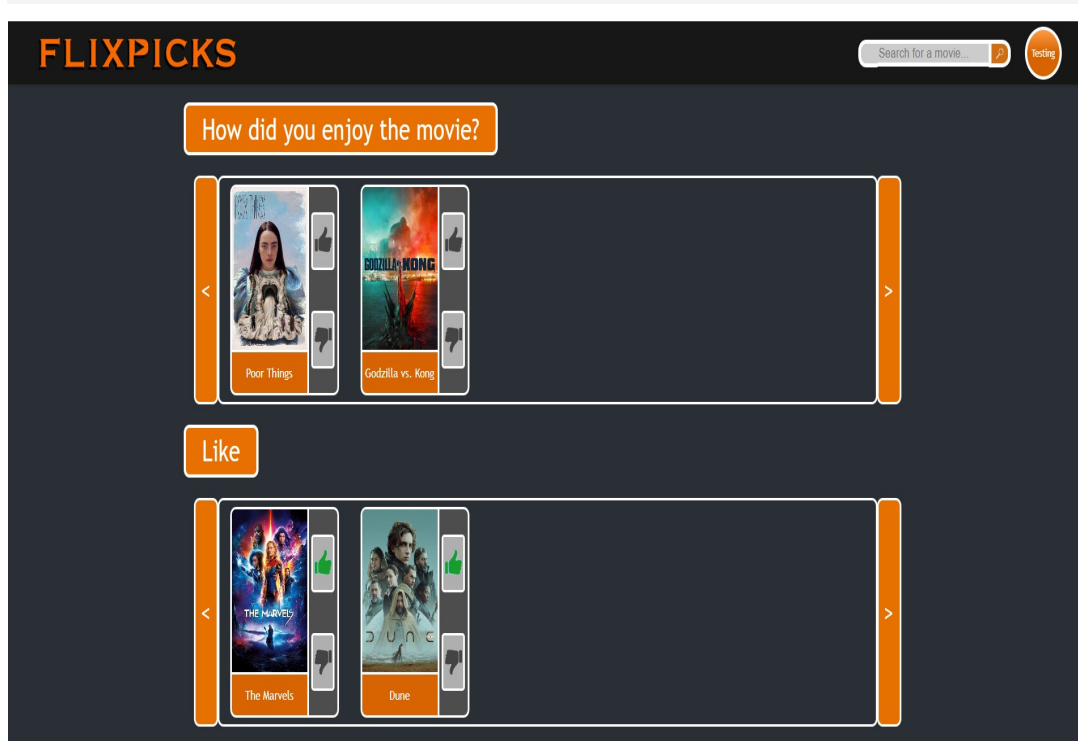

Prototype MFCD

Prototype Features

UI/UX Screens

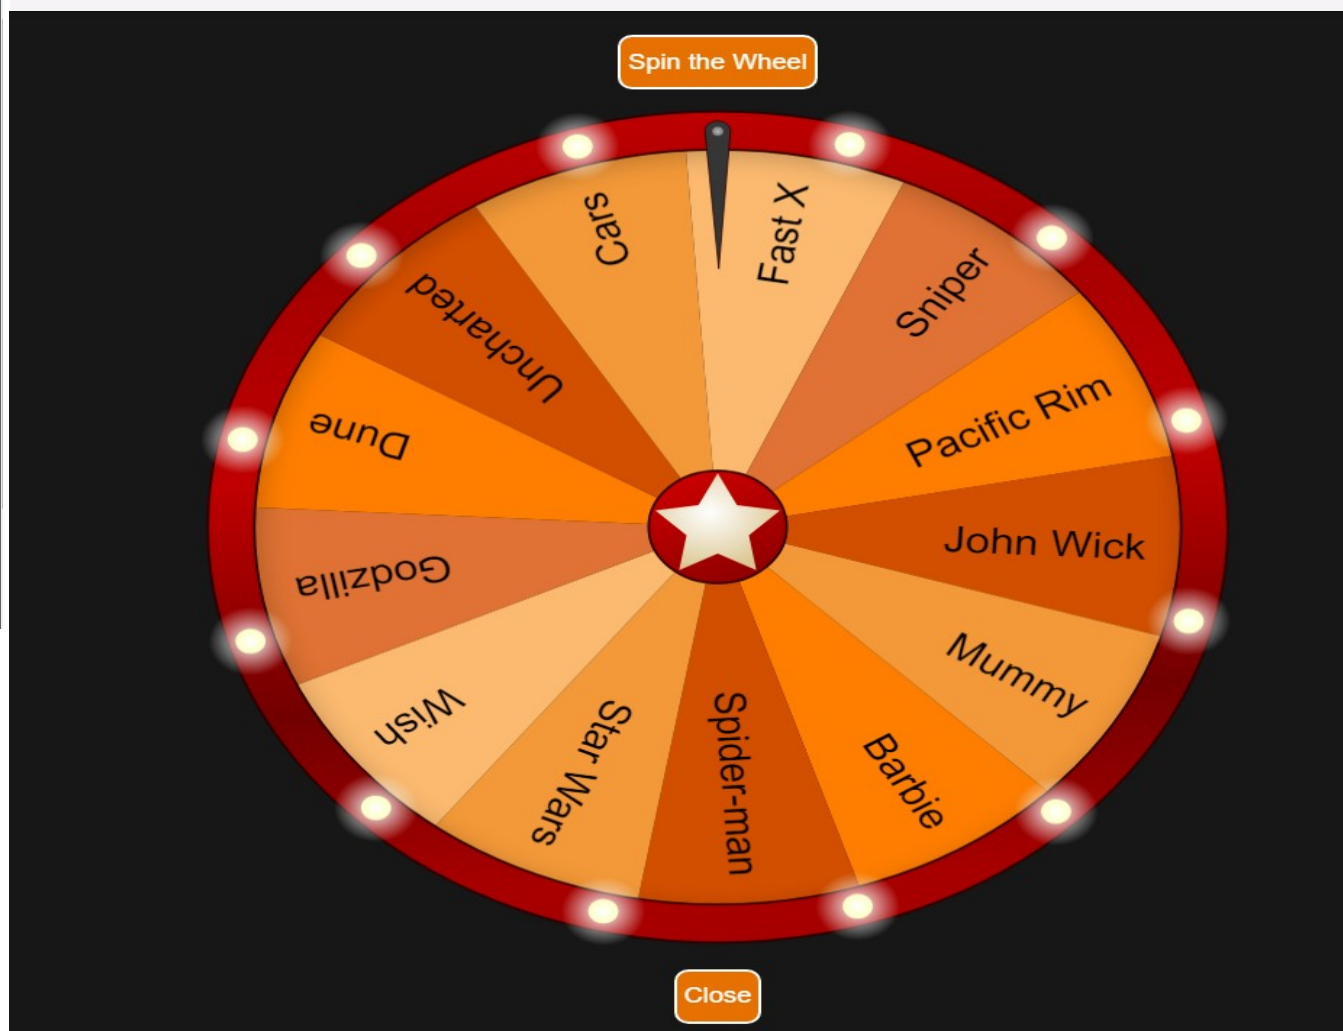

Watch History

The Watch History is a page with 3 rows, unwatched, like and dislike. Users rank movies selecting the thumbs up or thumbs down.

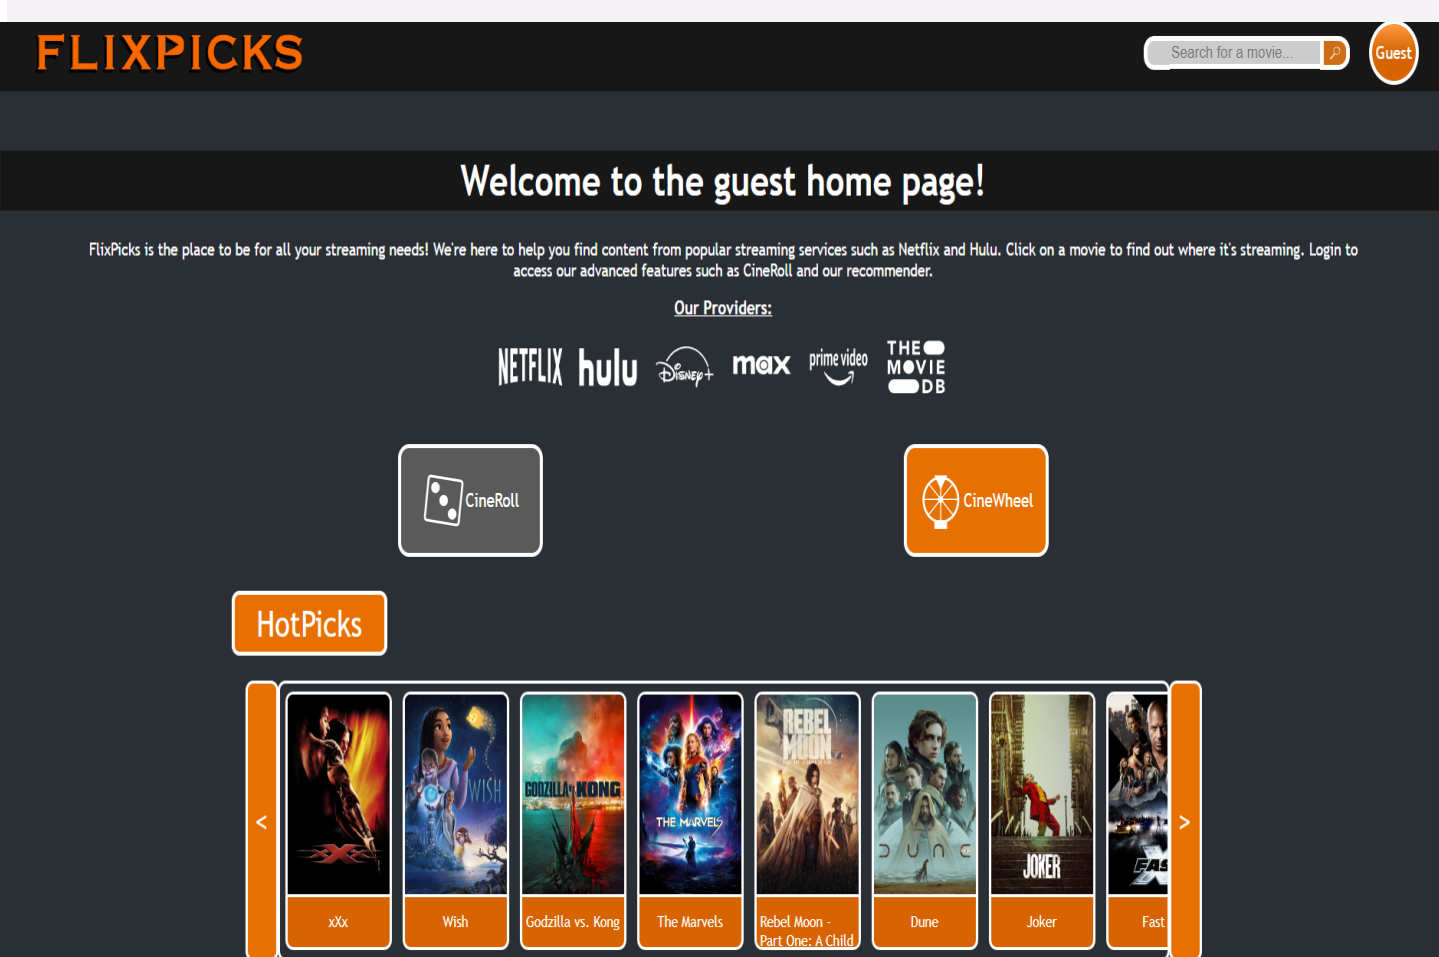

CineWheel

CineWheel is the page where you can input media options to open an orange wheel that spins and automatically selects a film for you.

FlixPicks Guest Homepage

Landing page for guest. They can access CineWheel and HotPicks.

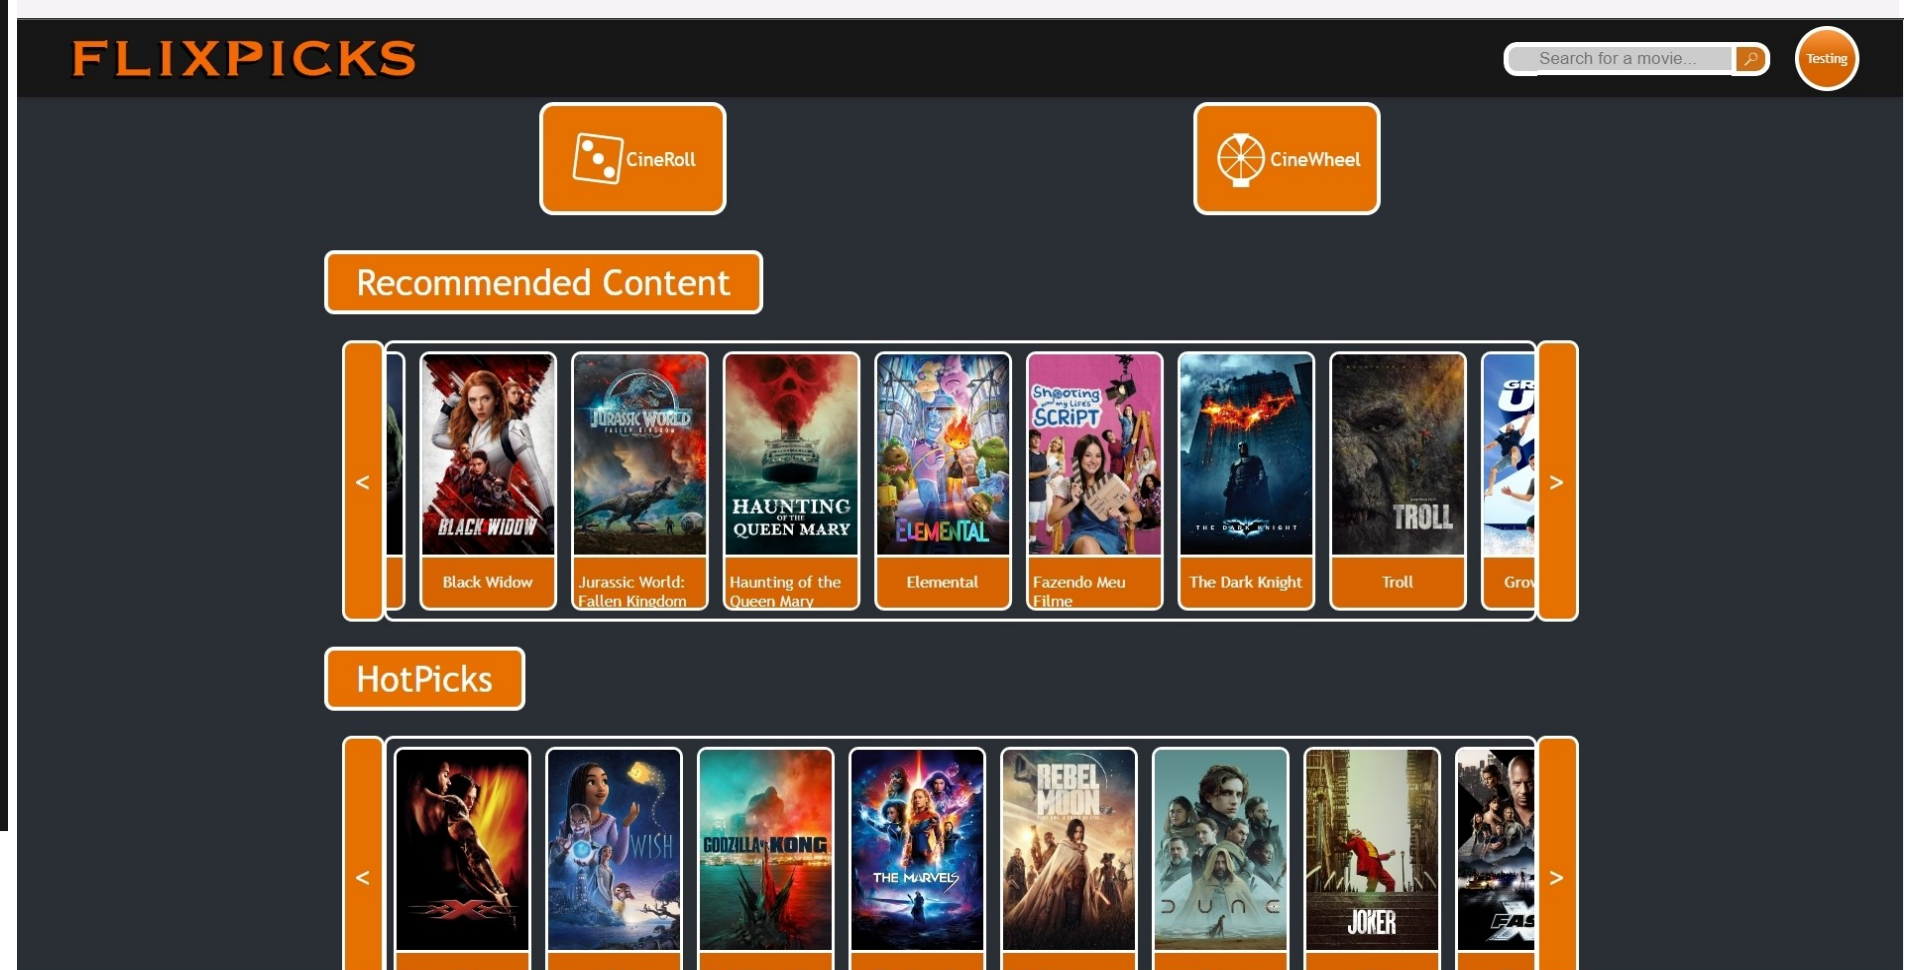

Database Tables

Page where all the data tables are located.

| Use Date | Recommendations | Content |
|----------|-----------------|----------|
| id | id | id |
| name | name | name |
| email | email | email |
| password | password | password |
| username | username | username |
| password | password | password |

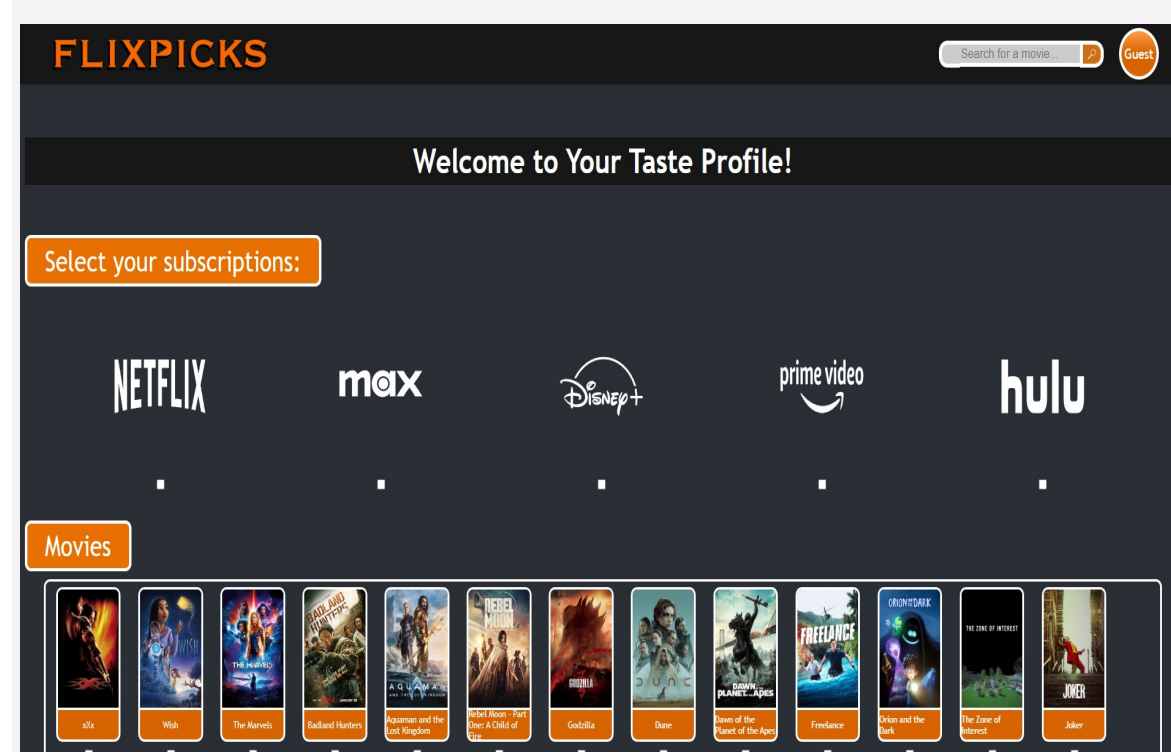

FlixPicks Homepage

CineRoll and CineWheel can be accessed here. Along with recommendations and HotPicks.

Taste Profile

Users select watched movies and owned subscriptions.
